

APPLICATION DEVELOPMENT & MOBILE COMPUTING

Whether it's in the Cloud, on premise, or on mobile devices, IntelliDyne's expert development team designs, builds and maintains a variety of Information Technology solutions. Our broad experience in object-oriented design, n-tier applications, enterprise architectures, user interfaces, agile development, and Information Delivery has given IntelliDyne a solid foundation to offer high impact solutions quickly. IntelliDyne reduces the complexity of deploying applications across multiple mobile platforms, designing context-aware applications.

Aligned with Government CIOs' missions and goals, IntelliDyne's Application Development and Mobile Computing solutions deliver meaningful and measurable business value at each and every step. As your trusted advisor, our consultants ensure that your applications are reliable, fit for use, and built to evolve with your business needs. Our custom software is being used by multiple government agencies to enhance productivity, promote collaboration, improve engagement and securely deliver information – anywhere, anytime on any device.

IntelliDyne recognizes that developing software is a human activity. Our solutions begin with understanding your business domain, operational activity, and the way people work. Interfaces are designed around the user experience from the top down and data is modeled from the bottom up to optimize performance and scale with your growth. Security is layered at every step. This holistic approach is continually checked against your success measures to ensure that value is evident as the needs and habits of your audience emerge.

When change is the only constant, IntelliDyne delivers results to our clients with agility and expertise that are second to none. Our DNA is made up of a unique blend of attributes, creating a full client experience with predictable outcomes. Every time.

Capabilities:

- ▶ Efficient Communication & Collaboration across devices for diverse audiences

IntelliDyne, LLC is a consulting firm that enables better business performance through innovative technology solutions. We manage public sector programs that deliver higher operational efficiency and measurable value to clients. We advise, develop, and execute effective solutions in Information Assurance/Cyber Security, Cloud Computing, Application Development and Mobile Computing, Analytics, Business Process Management, Data Center Consolidation, Enterprise Collaboration, and Enterprise Infrastructure Management.

Clients Demand. IntelliDyne Delivers.

“Our program was extremely pleased with the results of the IntelliDyne Intranet development project; namely the team fast-tracked the migration effort and completed the tasks almost one year ahead of schedule, without sacrificing quality. This achievement earned acknowledgement from both our Branch Chief and FEMA's CIO. It was a highly impressive accomplishment! To me, it is indicative of the team's commitment to performance and understanding of the critical nature of our work.”
