

# CORPORATE OVERVIEW

Founded in 2022 and headquartered in Hawaii, Galapagos-IntelliDyne (G&I) Solutions is a SBA-approved mentor-protégé joint venture that brings together Galapagos, LLC – a certified Small Disadvantaged Business 8(a) with the Small Business Administration (SBA) under Nā 'Ōiwi Kāne, a Native Hawaiian Organization (NHO), and IntelliDyne, LLC – a market-leading IT services firm that has been delivering information technology consulting services and solutions to Government and Commercial clients on matters of national, state, and local importance for over two decades.

Our MPJV structure provides large organization stability, a shared service centralized back office, and 30+ years of portfolio management, data analytics/science, cybersecurity, C4IM, COMSEC, and VIP/executive administrative support services. Leveraging the know-how and successful track record of our management team with the combined strength of Galapagos and IntelliDyne capabilities, G&I offers small business agility backed by large business reliability.

G&I Solutions strives to be a role model in business and community; do the right things for our customers and employees; create lasting customer relationships as a trusted partner, not just a vendor; and attract and retain a first-class diverse workforce.

### IT INFRASTRUCTURE AUTOMATION

IT Automation can be a critical mission enabler. Downtime, system failures, and cybersecurity incidents can have severe consequences, including data breaches and damage to an agency's reputation. G&I Solutions' IT infrastructure automation tools enable agencies to respond swiftly to critical events through automated workflows, thus mitigating negative impacts on business operations.

### CYBERSECURITY & INFORMATION ASSURANCE

Defending against the risk of information exposure and compromise, G&I Solutions is helping our clients manage security risk with a comprehensive suite of cybersecurity service offerings to protect assets and data from cyber attacks.

### ADVISORY & ASSISTANCE SERVICES

In supporting the complexity of today's A&AS requirements, G&I Solutions employs a highly skilled team with a myriad of technical expertise across multiple disciplines to successfully improve policy-making, decision-making, administration, program and/or project management or research and development (R&D) activities.

### IT PORTFOLIO MANAGEMENT

G&I Solutions helps organizations rationalize their suite of IT services and applications to best meet their business needs and appropriately invest in resources. We analyze existing technology, current projects, and future objectives to identify gaps, recommend improvements, and introduce a structured approach to portfolio management that aligns with the overall service strategy. Our experience with several agency-level consolidations has enabled us to refine our service delivery for optimized capabilities at enterprise scale.
